

Pre Cast Columbarium

Columbarium

The increasing demand for cremation opens opportunities for memorialisation in columbarium.

Norwalk in association with *Argo Architects* have designed a precast concrete module that is versatile in providing a quality concrete base on which to construct a beautiful columbarium.

Niche walls using clay or concrete bricks have dated badly and are no longer state of the art for memorialisation of cremated remains, leaving many cemeteries with unsaleable memorials.

Using a precast concrete core provides a solid base for a decorative and versatile columbarium of granite, marble, bronze, stainless steel or glass.

Norwalk columbarium modules can be placed on top of each other to form receptacles up to ten high if required or placed on their ends to form a seven high structure.

In either plane, they have a flat base, sized to accept the standard cremated remains container used by most crematoria for preservation and presentation of ashes.

Norwalk columbarium modules can be included in new mausoleums in areas that are not usable for casket interment, such as blank walls, providing an additional method of memorialisation and return on investment.

They can also be assembled as a stand alone memorial in a mausoleum forecourt, entrance hall, church, club, garden, or enhance a retaining wall and generate sales income.

They can also be pre-assembled into a columbarium that is delivered as a complete structure and placed on suitably designed footings so that it is available for use immediately.

Keeping the construction of the modules off site in our manufacturing facility ensures visitors and your staff are not affected by noisy obtrusive works for any length of time.

It also ensures every *Norwalk* columbarium module that is delivered to you is 100% reliable and purpose designed to suit you and your clients needs.

Norwalk's precast columbarium makes a unique and beautiful memorialisation for cremated remains

Our Staff

The staff at *Norwalk* share years of experience. They are passionate about making your job our best one and their expertise means you are guaranteed a product of the highest construction standards. Contact them and ask how *Norwalk* Precast Burial Systems can work for you.
