

NORWALK

PRE - CAST BURIAL SYSTEMS

since 1976

NORWALK Pre-cast Burial Systems

Since 1976, Norwalk has been designing and manufacturing high quality pre-cast concrete burial systems tailored to suit their client's needs.

During this time, each product has been designed to reflect the individual character of the project and built to meet its specific requirements and budgets.

By focusing on high quality workmanship from the start and by paying particular attention and respect to each religion's particular funeral rites, we have manufactured products that are readily accepted and are now demanded by each community.

We have extensive experience working closely with Cemetery Managers, Trusts, employees and contractors. We can manage projects from start to finish – always with the objective of completing a project that meets both your specifications and your expectations and on time.

Your project can be large or small. It may range in size from supplying just one vault

*Quality Burial
Systems designed
to respect
individual
burial and
interment rites*

One Piece Earth Liner (OPEL)

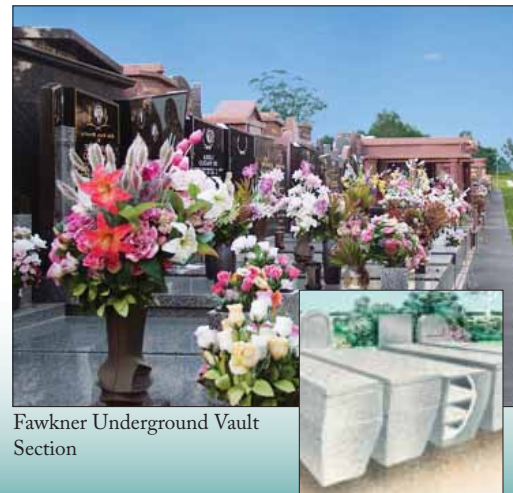

- Traditional earth contact burial
- Provides a safe, faith respecting interment
- Reclaim unstable or unusable land
- Install up to 3,800 units/hectare
- Will accommodate 1,2 or 3 burials
- Utilize your existing capital equipment
- Can safely support machinery and maintenance equipment
- Reduced on-going maintenance costs
- Allows for installation and planning pre-need

Burial Vaults

- Traditional form of sealed interment
- Can accommodate double or triple interment
- Installation of single or multiple units
- Reclaim unusable or unstable land
- Allows for planning & sale pre-need
- Safely support extensive monumental masonry
- Eliminates on-going maintenance costs

OPEL used in a lawn cemetery

Fawcner Underground Vault Section

Quality now and a reliable supply into the future

or OPEL to installing several hundred pre-cast concrete grave-liners, vaults or pre-cast mausoleum modules.

Whatever the size, your project will have the same level of expertise and attention devoted to it.

Norwalk's Pre-Cast Burial Systems allow you to use all of your available land and gives you the opportunity to offer the widest range of options to suit your client's needs.

The structural integrity and strength of all Norwalk Pre-Cast Burial Systems ensure that your staff, mourners and visitors are safe and protected at all times. Norwalk Pre-Cast Burial Systems are designed to last and serve their purpose well into the next century and beyond.

Traditional form of interment options include:

- One Piece Earth Liners
- Burial Vaults
- Memorial Gardens
- Mausoleums

Pre-need sales enable you to recoup your establishment costs earlier in the use/uptake cycle

Memorial Gardens

- Up to 400 cremated remains can be stored
- More secure than a niche wall as remains are stored below ground
- Living memorial to the deceased
- A natural asset which improves with the passing of time
- Utilize areas which may have become landlocked or otherwise un-useable
- A tranquil place of reflection
- Easy to maintain

Mausoleum – Modular Pre-Cast Crypts

- Suitable for both Private & Trust Mausoleums
- Complies with AS 4425-1996 *Above-ground burial structures*
- Complies with AS/NZS 3500.2-2003 *Plumbing and drainage - Sanitary plumbing and drainage*
- Compliant with current Working in Confined Space Legislation
- Patented modular design for faster installation and millimetre perfect assembly (typically 16 Crypts can be installed within a couple of hours)
- Faith respecting interment
- Easily resealed

Williamstown Mausoleum

Norwalk Pre-cast Burial Systems simplify tasks for your staff and provide peace of mind on the day of interment

Mausoleum

Norwalk can provide a complete mausoleum or supply and install its patented pre-cast mausoleum modules to fit out a mausoleum, constructed by others.

- Norwalk will design for Private Mausoleums and Cemetery Trusts
- Pre-cast modules comply with *AS4425-1996 Above-ground burial structures*
- Modules are supplied fitted with all drainage, venting & sealing requirements
- Venting and draining of modules complies with *AS/NZS 3500.2-2003 Plumbing and drainage - Sanitary plumbing & drainage*
- Each module is structurally complete and sound
- Assembly time on site is the fastest of any construction method
- No maintenance requirements ever needed
- Staff never need enter a mausoleum module to remove the pre-use sealing bungs
- All modules are identical as they are produced in a steel mould

The day of interment
