NORWALK One Piece Earth Liners

One Piece Earth Liners (OPEL)

OPEL used in a lawn cemetery

*Norwalk's -
One Piece Earth
Liners simplify
tasks for your
staff, providing
peace of mind
on the day of
interment*

The innovative NORWALK OPEL (One Piece Earth Liner) is purpose designed with an open base and large openings on all sides and with substantial lid covering to provide a secure method of interment for faiths that require a FULL EARTH CONTACT BURIAL.

Importantly, placement of the deceased in the traditional method by family or staff descending into the grave can comply with OH&S requirements for shoring an excavation by installing the NORWALK OPEL.

Seven lids, each capable of being lifted by one person, cover the top of each module and provide a secure support for backfilling that will never subside. Where two interments in the one plot are envisaged, two NORWALK OPEL are installed at the time of the first interment. The lower OPEL provides a firm base for installation of the second, which then becomes a shield against cave-in when placement of the deceased is being carried out in the lower.

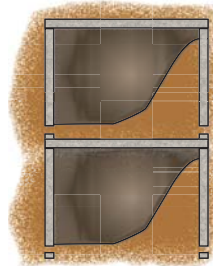

No additional capital equipment is needed to install the NORWALK OPEL as your existing equipment will be capable of the task using the specialist NORWALK designed lifting gear. This enables the

OPEL module to be lifted into the plot in one movement and then remove all 7 lids in one movement. Replacing the 7 lids is also achieved in one movement. The heaviest lift that will be necessary by your staff is lifting a single lid, which weighs only 29kg.

Keeping the construction of the NORWALK OPEL modules off site in our purpose built manufacturing facility means noisy construction processes are away from your clients and staff. No assembly is required in your cemetery, the NORWALK OPEL modules are delivered in one piece, with all lids located in their place on top of the module, making installation in the excavation quick, simple, safe and efficient.

You can be confident that every NORWALK OPEL module shipped from NORWALK is 100% reliable, structurally sound and purpose designed to meet your needs and most importantly, those of your clients.

NORWALK Precast Burial Systems help you manage your cemetery by providing cost effective, purpose designed products that minimise interruptions, reduce noise, last indefinitely, and provide your staff and visitors with a safe workplace.

Our Staff

The staff at Norwalk share years of experience. They are passionate about making your job our best one and their expertise means you are guaranteed a product of the highest construction standards. Contact them and ask how Norwalk Precast Burial Systems can work for you.
