www.norwalk.com.au

NORWALK PRE-CAST BURIAL VAULTS, CREMATED REMAINS VAULTS & ONE PIECE EARTH LINERS (OPEL's)

Norwalk manufacture 6 different pre-cast burial vaults. Each vault can accommodate either ***single, double or triple interments***, depending on the vault design.

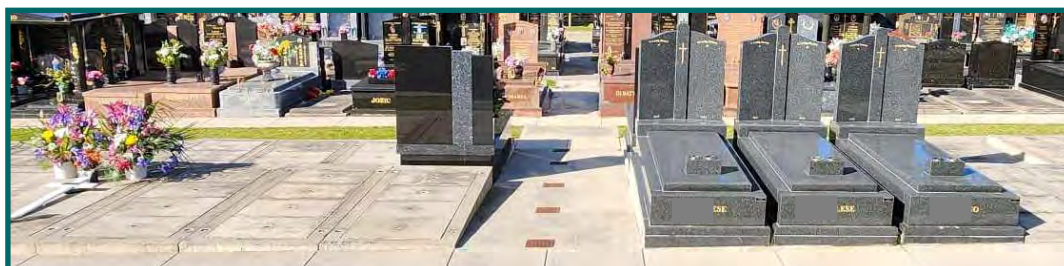

Most of our vault designs can be used as a cremated remains vault, holding up to ***400 full sized cremated remains containers or 5m³ of unclaimed ashes***.

To ensure the safety of your staff and visitors our vaults have been engineered to ensure they can safely ***support extensive monumental masonry*** and have ***certified lifting points*** on both lids & vaults.

Vaults can be installed as needed or pre-installed allowing for ***planning & sale pre-need***.

Our ***Traditional Muslim Burial Vault*** (TMBV) provides a faith respecting ***full earth contact*** interment, from blank plot to completed burial in ***less than one hour***, honouring the religious tradition of burials taking place as quickly as possible. The use of these vaults provides a safe burial environment for staff and family and reduced ongoing maintenance after interment.

Our ***One Piece Earth Liners*** (OPEL's) provides a faith respecting ***full earth contact*** interment and are able to support substantial monumental masonry.

NORWALK "SPRINGVALE" BURIAL VAULT

NORWALK "FAWKNER" BURIAL VAULT

NORWALK "CANBERRA" BURIAL VAULT

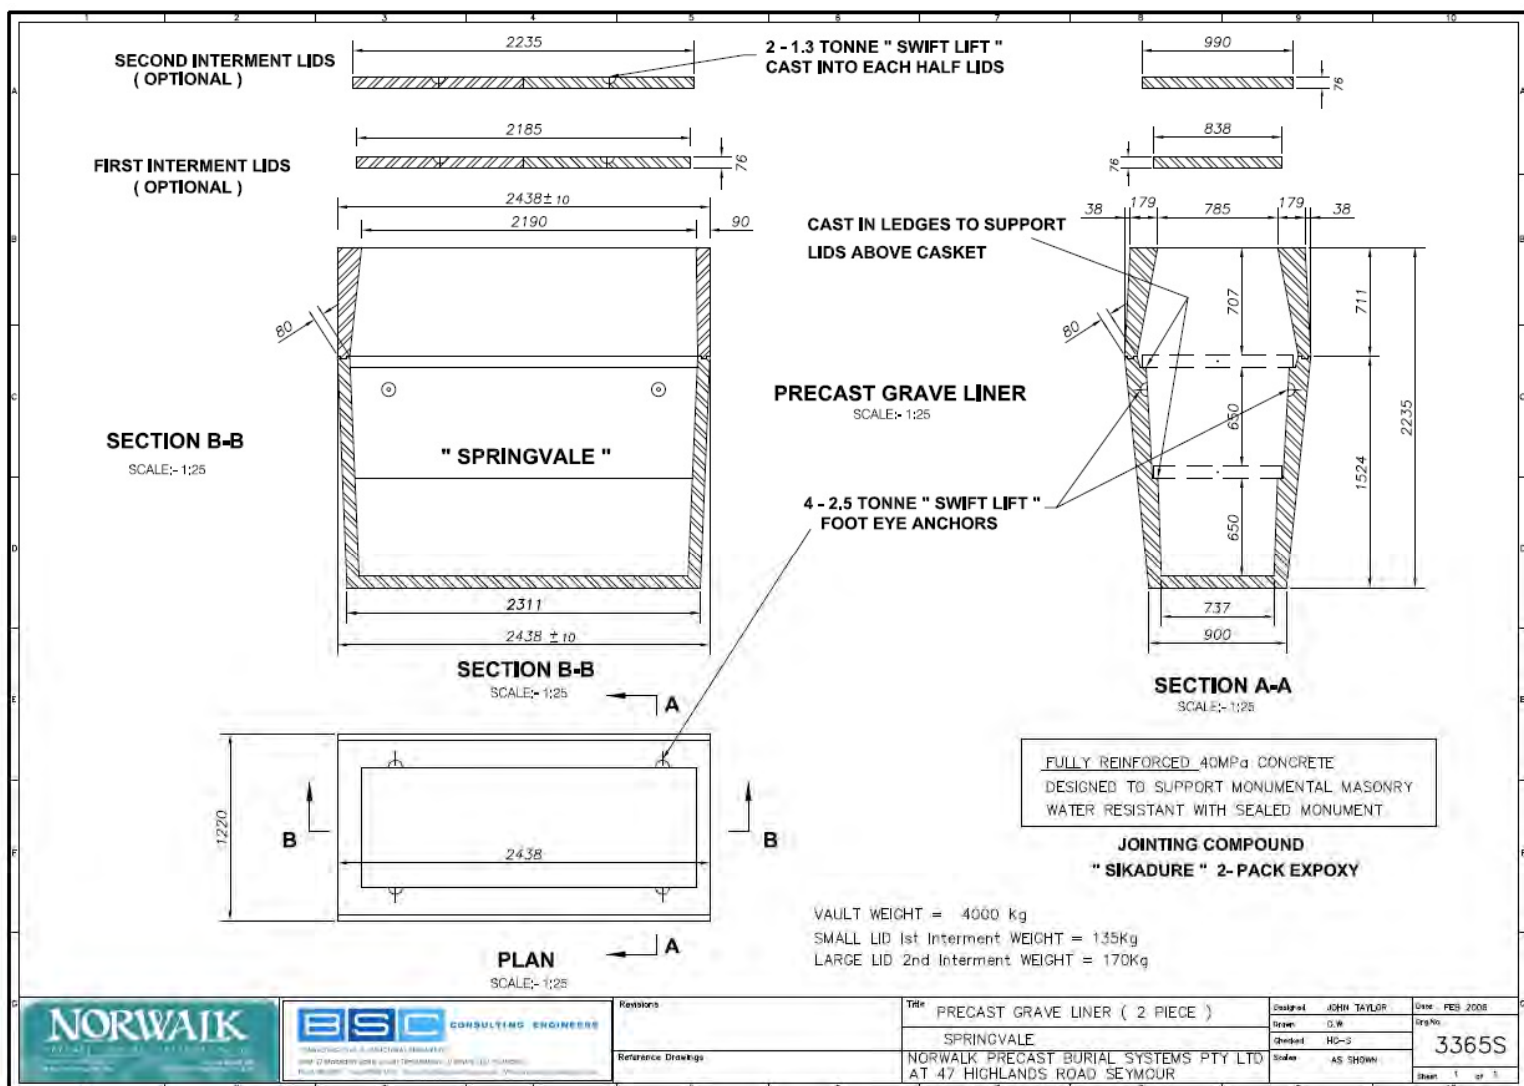

NORWALK “SPRINGVALE” BURIAL VAULT

Size:2235H x 2438L x 1220W

Vault Weight: 4,000kg

Lid Weight: Small (1st Interment) 270kg (135kg x 2)

Large (2nd Interment) 340kg (170kg x 2)

Please contact us directly for copies of detailed drawings

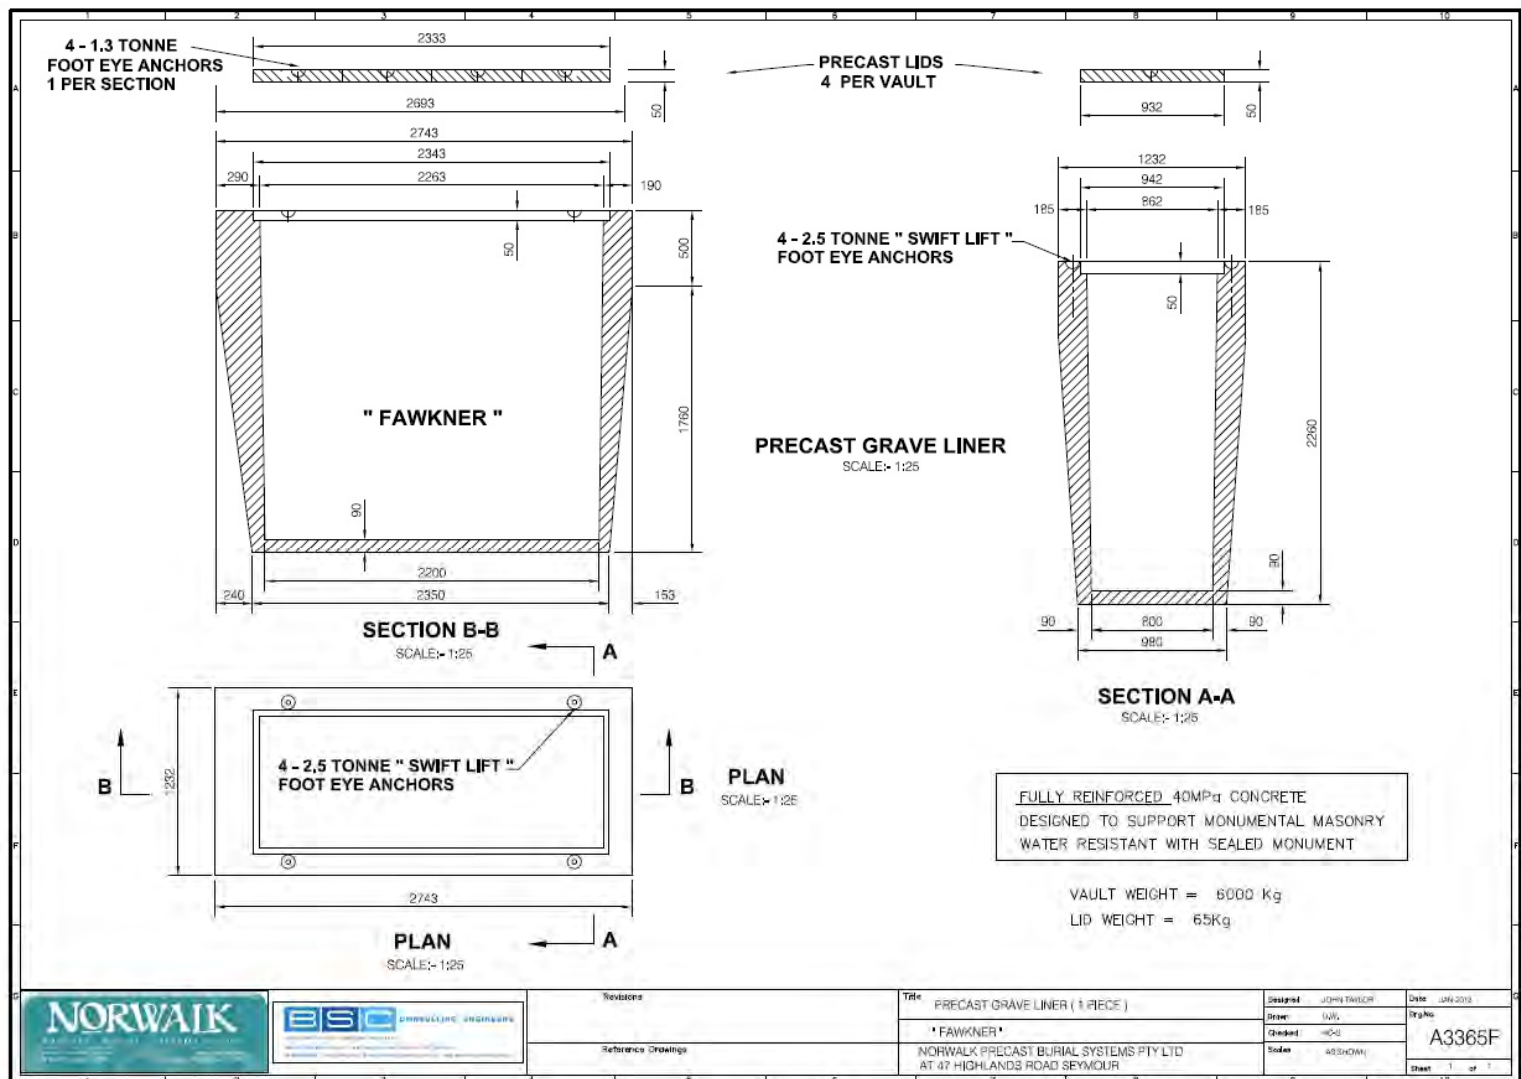

NORWALK "FAWKNER" BURIAL VAULT

Size: 2260H x 2743L x 1232W

Vault Weight: 6,000kg

Lid Weight: 260kg (65kg x 4)

Please contact us directly for copies of detailed drawings

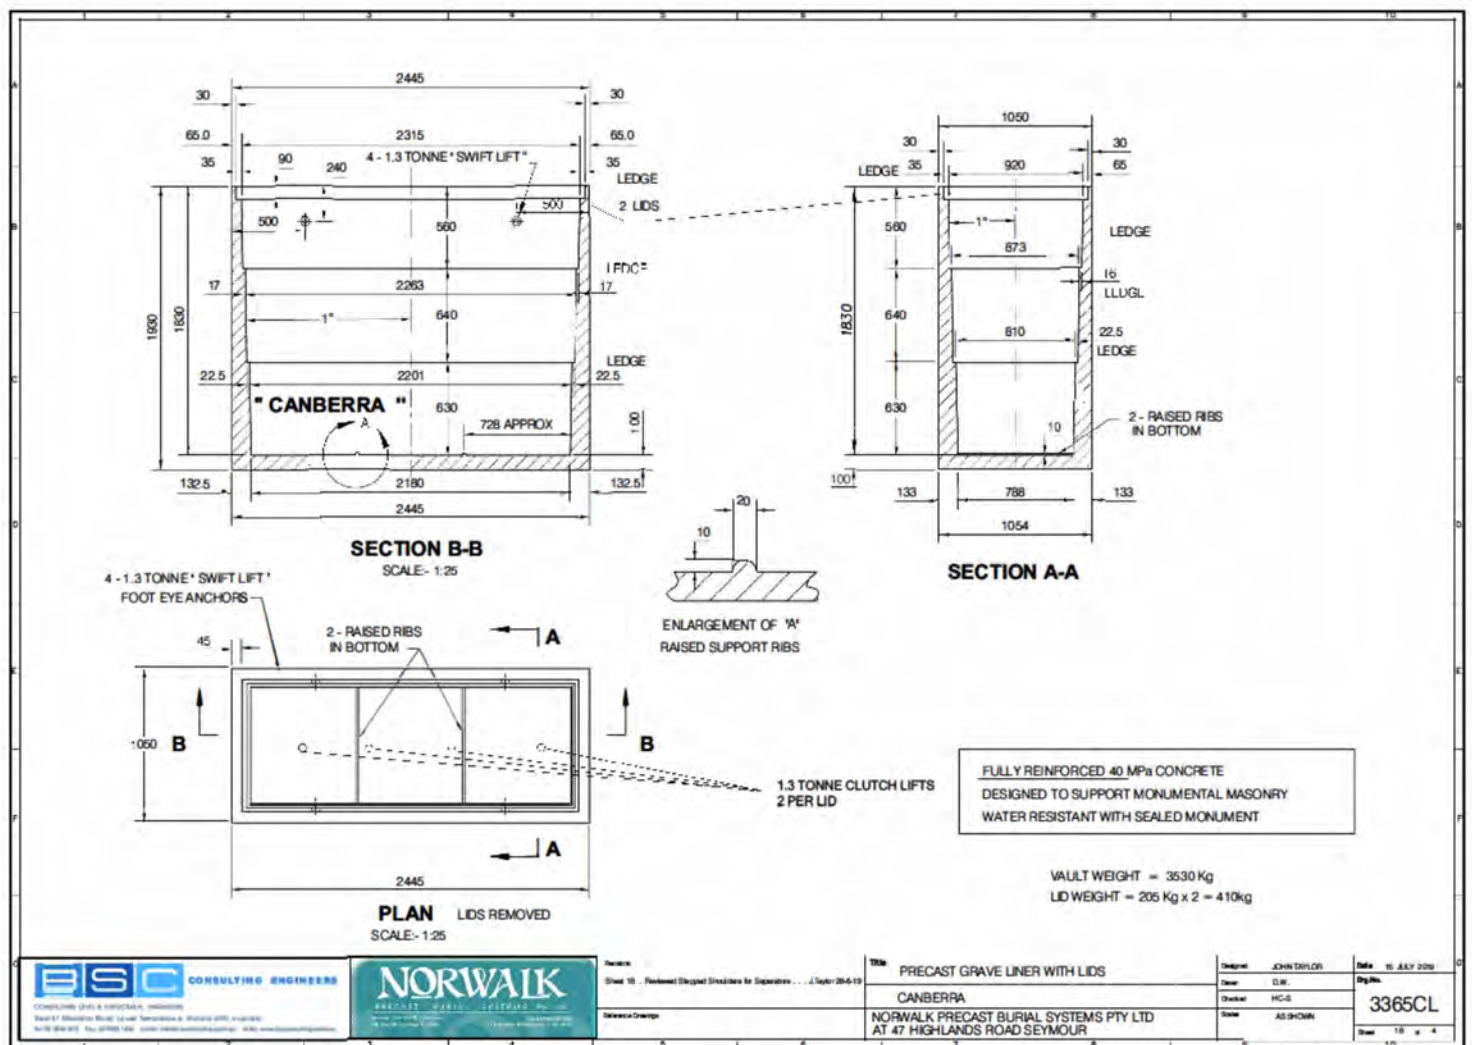

NORWALK "CANBERRA" BURIAL VAULT

Size: 1930H x 2445L x 1050W

TRUE COMPANION

Private Mausoleums

using Norwalk Precast Burial Systems mausoleum crypts

Norwalk Precast Burial Systems have been working with architects and builders for nearly 50 years creating beautiful private mausoleums for families.

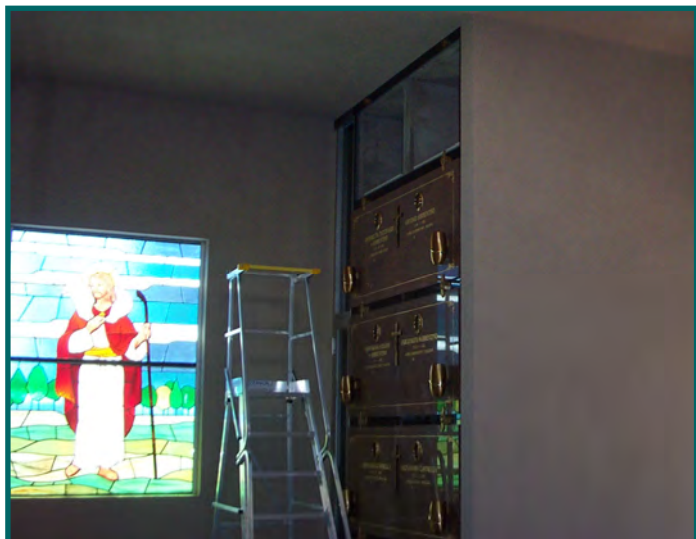

Having supplied our mausoleum crypts to numerous private mausoleums in cemeteries over much of Australia, you can be assured that we can help your families mausoleum vision become a beautiful reality.

Norwalk Precast Burial Systems offer our services and expertise in assisting your families to design and build their private mausoleums.

We can assist with:

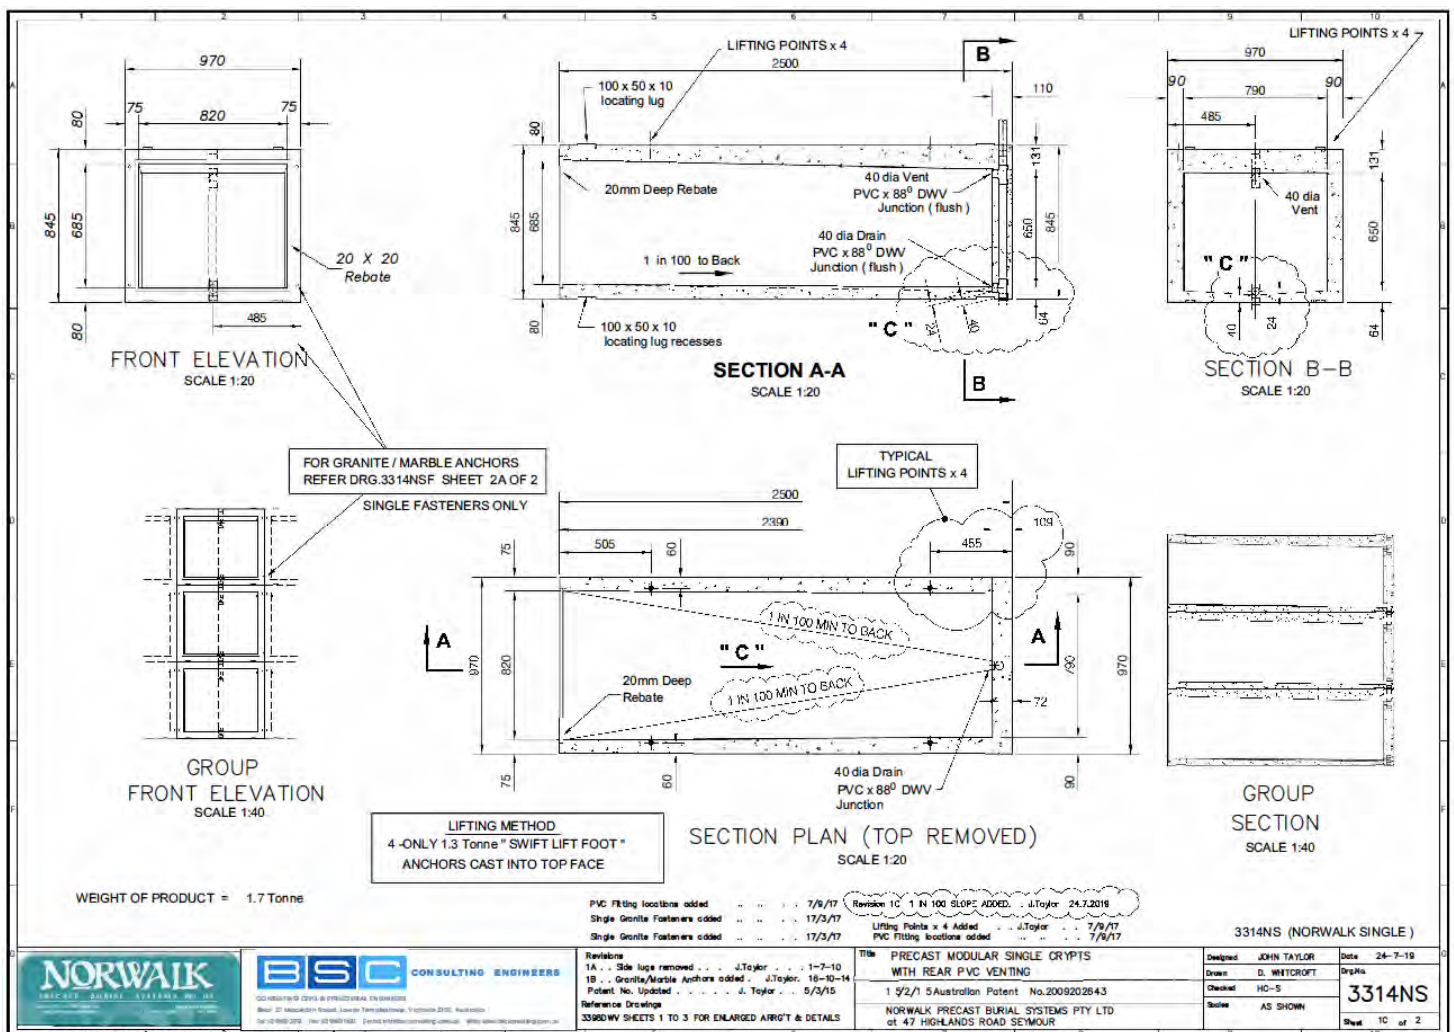

- ◊ Design (including basic architectural drawings)
- ◊ Structural calculations
- ◊ Drainage and slab layout
- ◊ Supply and installation of pre-cast crypts, columbarium modules and memorial products.

Small Public Mausoleums

using Norwalk Precast Burial Systems mausoleum crypts

Norwalk Precast Burial Systems have been working with our architect and consulting engineer to create some design ideas for small mausoleums using our pre-cast crypts.

As both our pre-cast mausoleum crypt designs are able to **support a roof directly on top** of the product, we believe they are the perfect fit for your next small mausoleum as there is no need for any additional structural supports.

Norwalk Precast Burial Systems **offer our services and expertise** in assisting cemeteries to design and build small mausoleums.

We can assist with:

- ◇ Design (including basic architectural drawings)
- ◇ Structural calculations
- ◇ Drainage and slab layout
- ◇ Supply and installation of pre-cast crypts and columbarium modules

The estimated timeframe to install our precast modules, roof, decorative finishes on sides and back and the crypt shutters onto a prepared concrete slab may be as **little as 3 weeks!**

We anticipate the cost of the completed mausoleum to be less than that of a cast-in-situ mausoleum with **considerable time saved** on site during construction.

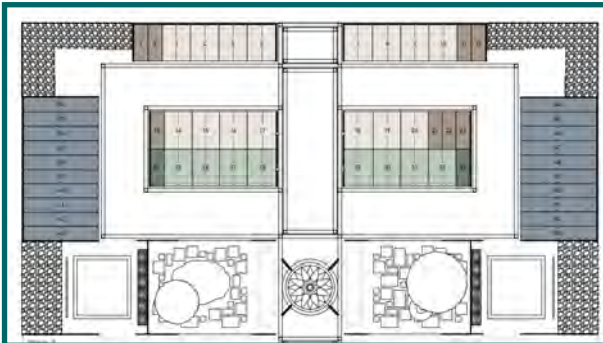

By installing multiple smaller mausoleums, the initial costs to your cemetery are dramatically reduced and cashflow is improved, helping to provide funds for your next small mausoleum as demand requires.

Large Public Mausoleums

using Norwalk Precast Burial Systems mausoleum crypts

In 2020 John Taylor, founder of Norwalk Precast Burial Systems, designed our new Modular Multi Space Mausoleum Crypts. These crypts were designed to compete directly with cast-on-site mausoleums as they achieve the same number of crypt spaces per square meter whilst saving our clients up to 90% of the on-site installation time when compared to cast-on-site. The first installation we

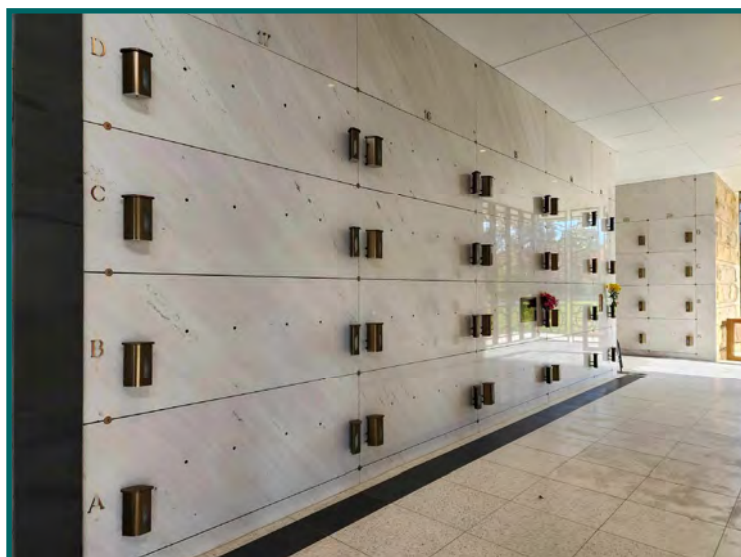

undertook with these new designs was the All Souls Mausoleum at Springvale Botanical Cemetery where we completed the installation of **384 crypt spaces and 2 columbarium walls in just 10 days.**

These new Multi Space Mausoleum Crypts come in either 2, 3, 4 or 6 space designs complete with all required vents and drainage and are available as a single entombment or True Companion (for 2 caskets aligned one in front of the other).

The Norwalk Modular Multi Space Mausoleum Crypts are ideally suited for large public mausoleum projects but can be used for any sized project, just as our standard crypts can be utilised in large public mausoleums if they suit the project requirements better.

All our products comply with Australian Standards AS4425:2020 Above-ground burial structures and AS/NZS 3500.2:2021 Plumbing and drainage Part 2: Sanitary plumbing and drainage.

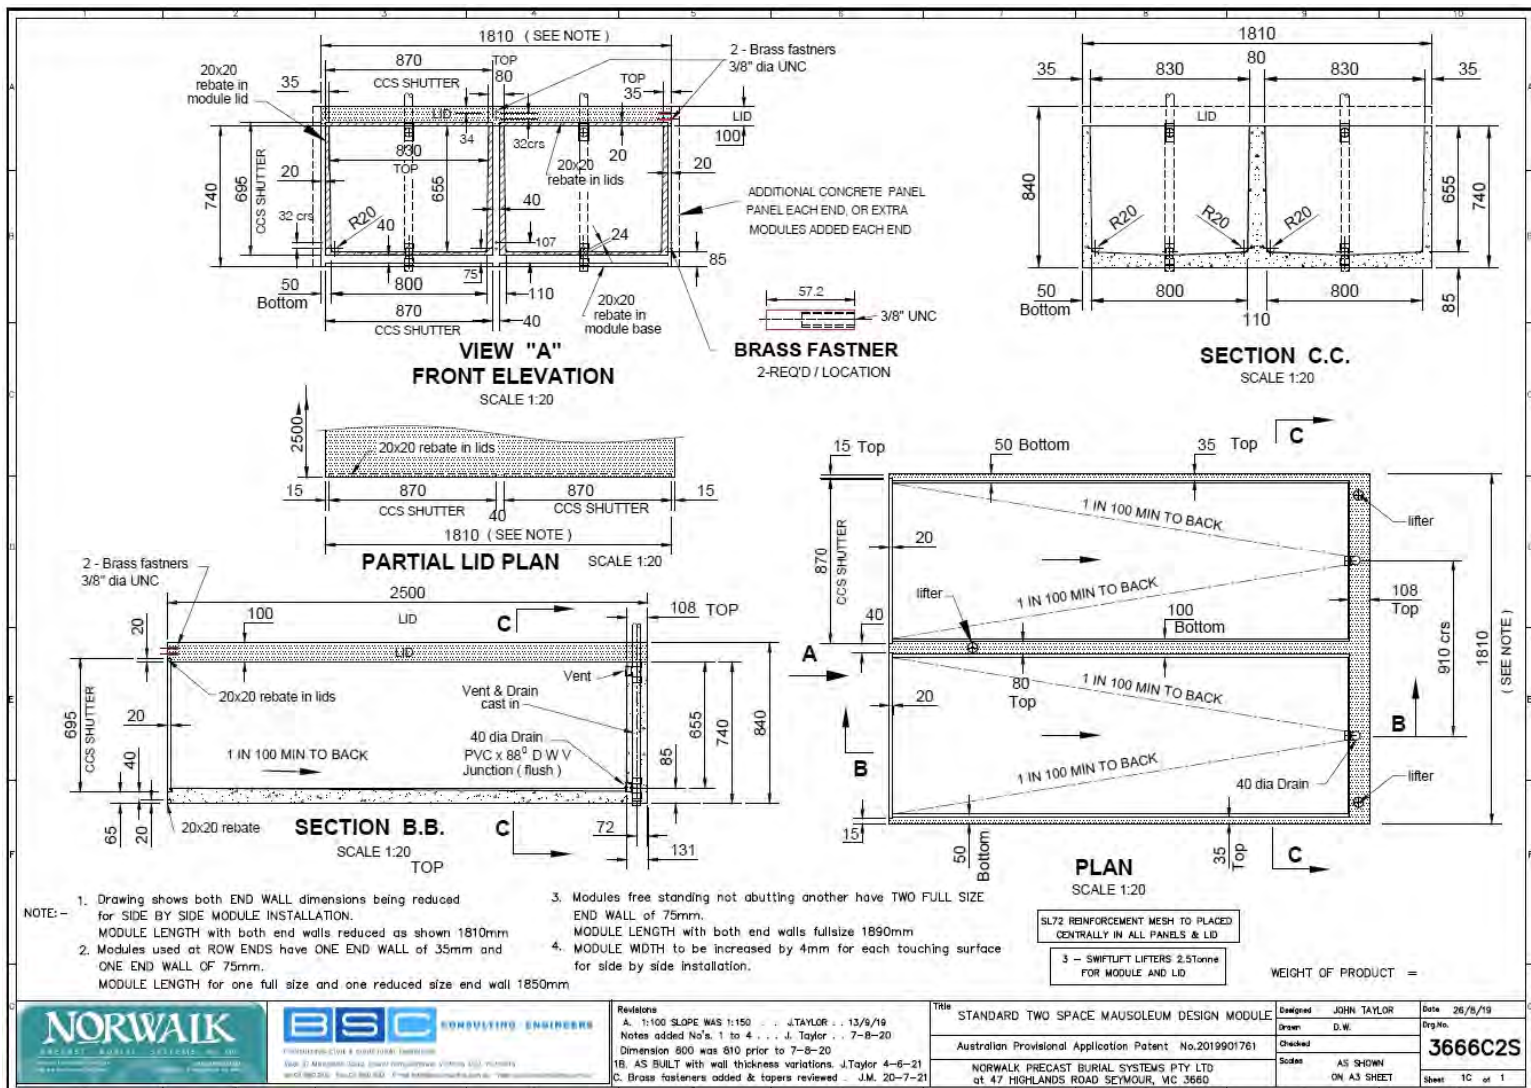

SINGLE 2 WIDE MODULAR MAUSOLEUM CRYPT

Size: 740H x 2500L x 1810W*

Crypt Weight: 1,715kg

*width of module will vary with wall thickness—see drawing for details

Pre-cast Columbarium Modules

Proudly manufactured in Australia

47 Highlands Road, Seymour, Victoria
info@norwalk.com.au

03 5799 0083
www.norwalk.com.au

Columbarium (Niche) walls, seats and surrounds

using Norwalk Precast Burial Systems columbarium modules

One of the great things about Norwalk Precast Burial Systems columbarium modules is that they are so versatile, made from **high strength concrete** they will not crack, fade or deteriorate. We have specifically designed our molds to enable us to make slight changes to allow for many **different design options**.

We are also able to offer our columbarium modules in **coloured concrete** with a **fully customizable top**, (possible finishes including natural, exposed stone or recycled glass aggregate, polished or timber look).

The varying designs can **hold between 1 & 4 full sized ashes containers**, allowing for individual or family spaces. We can also make smaller spaces if required for your project.

Fittings to allow for threaded screws can be supplied to attach shutters (of your choice) allowing shutters to be in place prior to interment or shutters can be glued directly to the face of the module. Plaques can then be attached to the shutter.

Our modules can be installed in various ways to **create the look you envisage**; be it a stand alone memorial wall, a niche wall as part of a mausoleum, inground columbaria, as a bench, a seat or a garden bed, water feature or tree surround. Each one can be completed with our fully customisable top meaning all that is left to do is choose your shutter.

The design of our columbarium options allow for **planning & sales pre-need**.

Columbarium (Niche) Walls

Columbarium (Niche) Seats and Surrounds

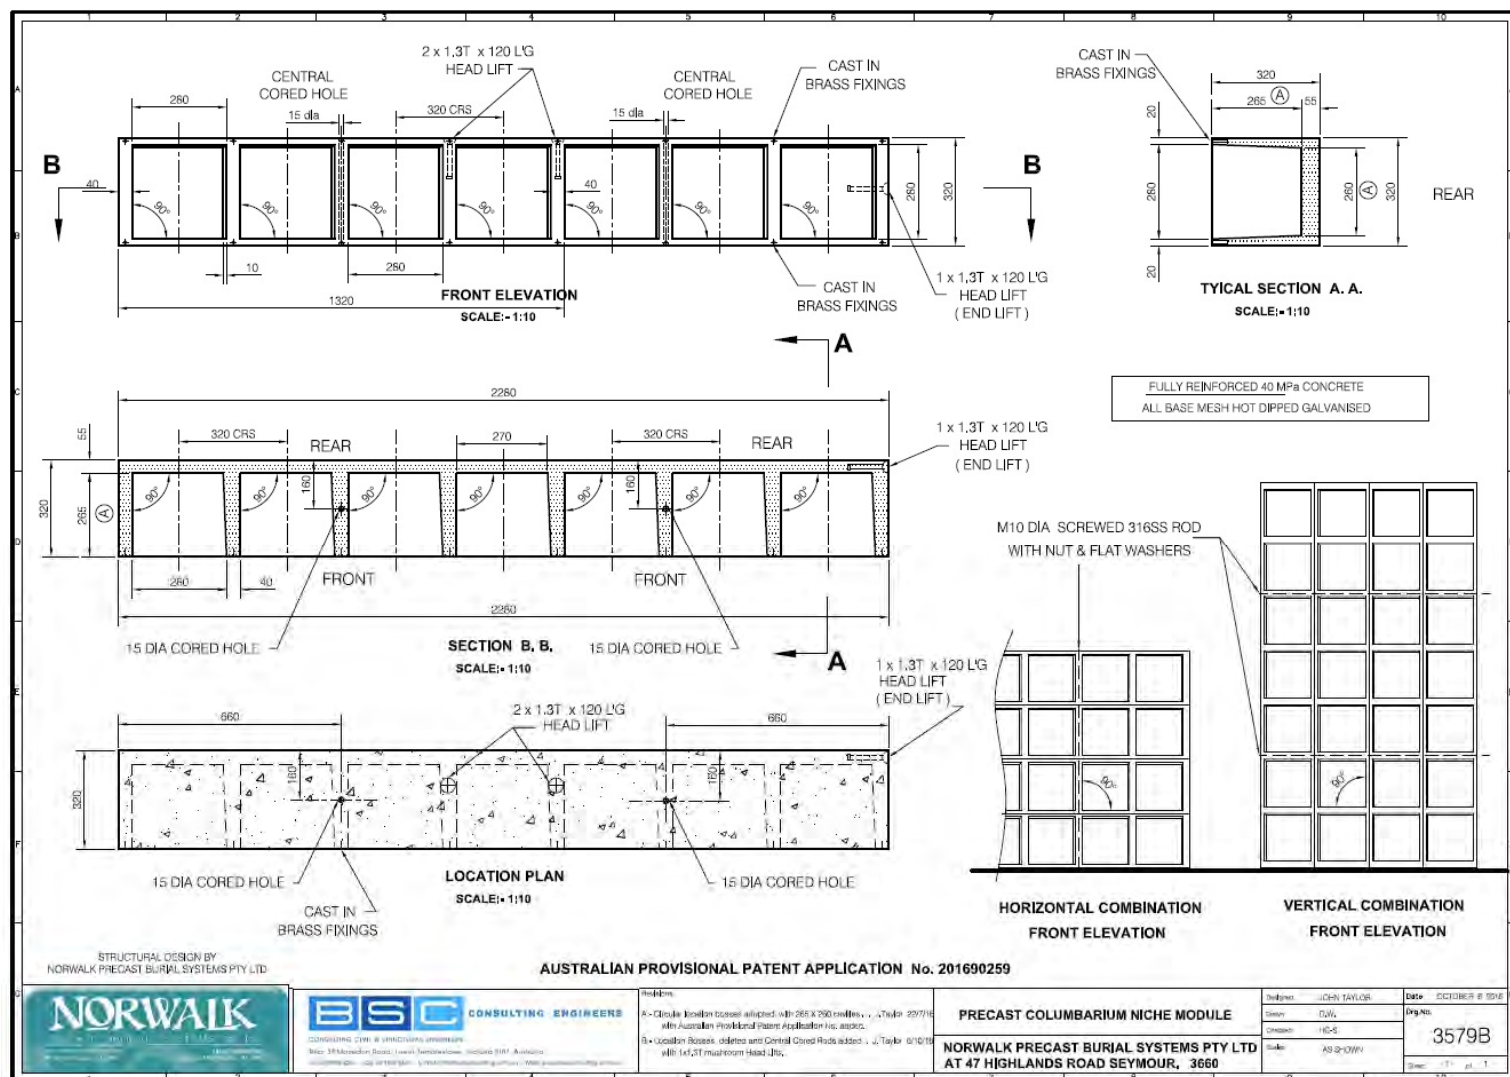

5 or 7 SPACE COLUMBARIUM MODULE

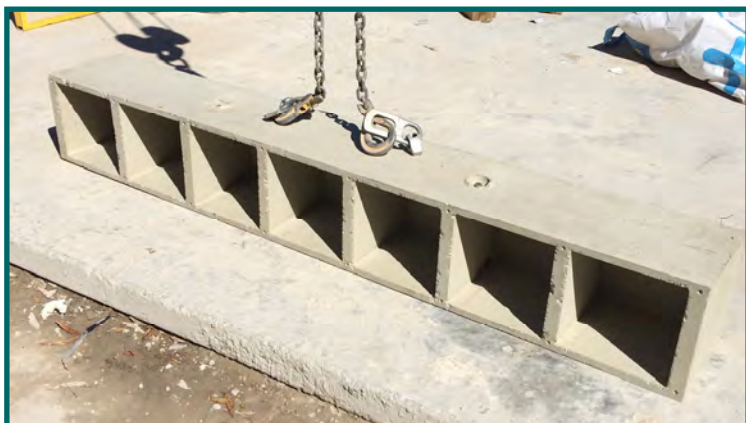

Size: 2280mm or 1640mm x 320mmHx 320mmD

Module Weight: 230kg

Each space can be divided into smaller interment spaces if required

Memorial Poles

Glass infills
available

Glow in the
dark aggregate

Made from high strength coloured concrete, our poles will not rust, fade or deteriorate. They are fully customizable with possible finishes including natural, exposed stone or recycled glass aggregate, polished or timber look. Various sizes available and can be custom made with the option to include personal items.

MEMORIAL POLES - with or without ashes interment

Standard Height prior to installation - 2280mm, 1800mm, 1500mm, 1100mm

Standard Widths - 320mm, 280mm, 250mm, 200mm

Standard Depths - 70mm, 120mm, 200mm

Custom sizes/designs available

Memorial Poles

Options include space for **ashes interment** (full container or smaller options for part interment), fittings to attach metal art, bird feeders, solar lights, glass infills, glow in the dark, exposed aggregate, polished, inclusion of personal items, pipework for water or electrical cords.

Totally **customisable**, we can turn your design into a completed memorial piece.

Ferrules can be added to allow for addition of artwork, bird feeders or other attachments.

Large **variety of colours** available. You can design a piece that will blend into the natural environment or a piece to stand out and be noticed.

Memorial Desks

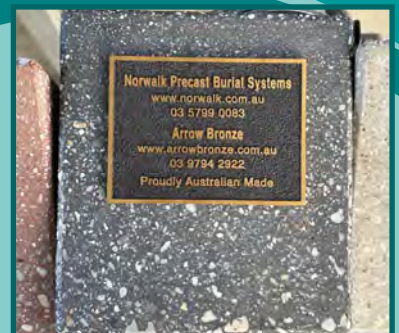

Tall desk with space for full sized ashes container

Made from high strength coloured concrete our memorial desks can come with or without a space for ashes interment. They are fully customizable with possible finishes including natural, exposed stone or recycled glass aggregate, glow in the dark, polished or timber look. A space for flowers can also be added if desired. Various sizes available and can be custom made to the size/design you require.

Small desk with flower holder

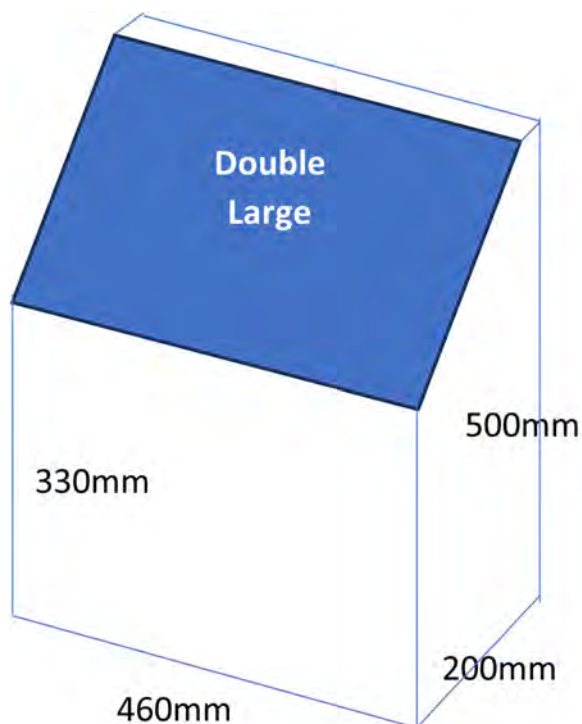

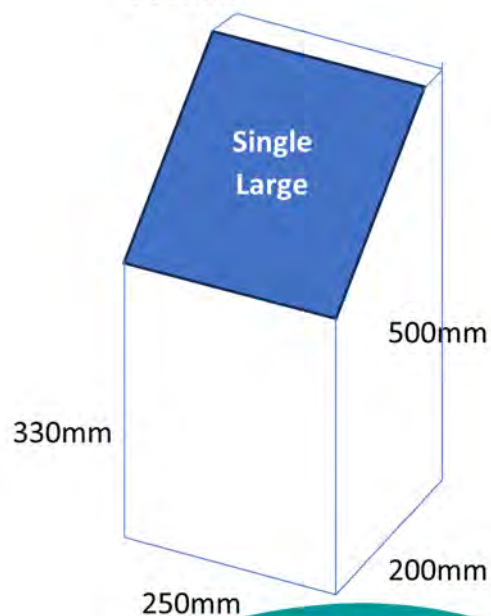

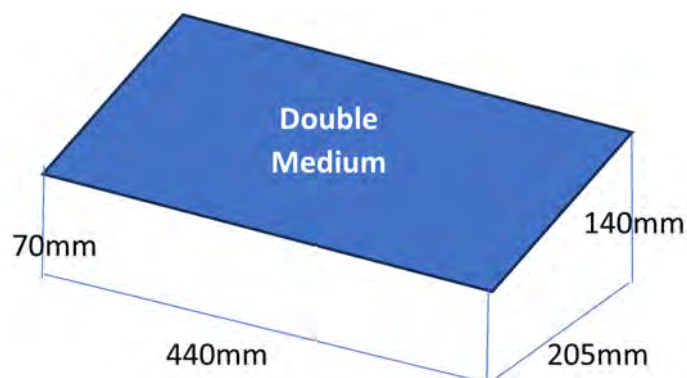

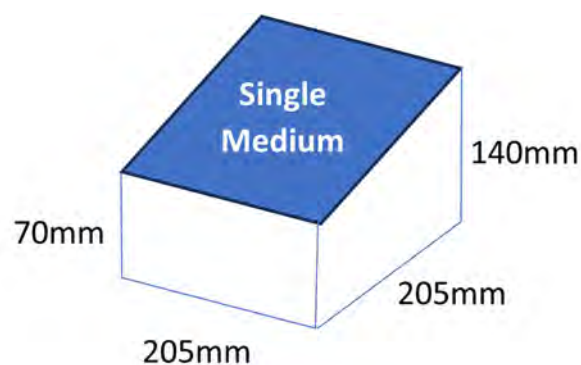

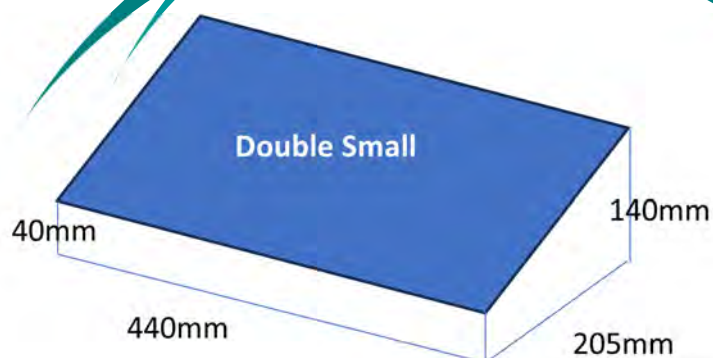

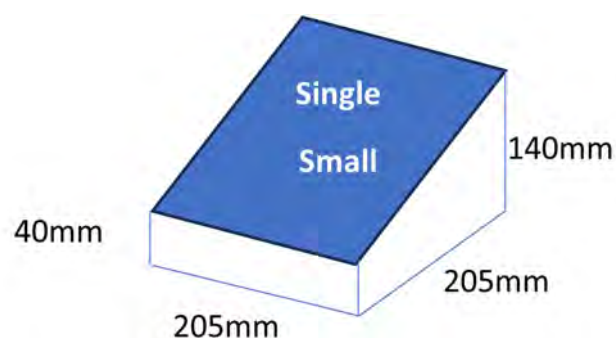

Glow in the dark aggregate

Medium desk with small ashes interment

MEMORIAL DESKS - with or without ashes interment

Custom sizes and designs available

MEMORIAL STOOL/ART BASE

Made from high strength coloured concrete our memorial stools/art bases hold up to 6 full sized cremated remains containers.

These can be left as a stool or finish off with a piece of artwork, pot plant or light.

Large variety of colours and finishes available, natural, exposed stone or recycled glass aggregate, glow in the dark, polished, patterned (as pictured) or timber look.

Ferrules can supplied in lid to attach artwork, pot plant, lighting or other attachments.

Pictured is a terracotta patterned base with exposed aggregate lid 540mm high x 380mm wide x 345mm deep finished with metal art.

MEMORIAL SEAT

Fully customisable with the option of arm rests and seat backs.

Large variety of colours and finishes available, with various leg and seat designs. Seat and leg finishes can be the same or different.

Easy installation by either digging into the ground or legs can attach directly to a pre-prepared concrete slab.

MEMORIAL PAVERS

Made from high strength coloured or plain concrete we have numerous sizes and designs of pre-cast memorial pavers.

580 x 455 x 50

Personal or generic items can be used to indent pavers.
A recess can be made to size to fit a plaque.

580 x 455 x 50

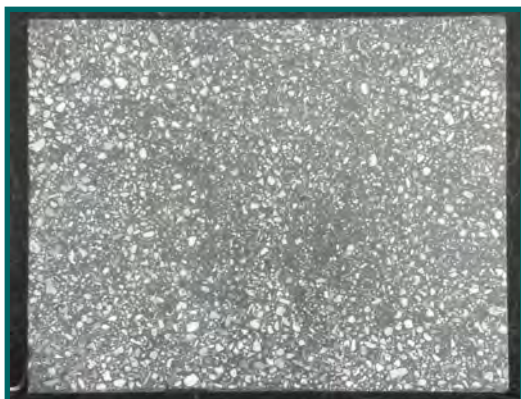

450 x 450 x 50

450 diameter x 50

600 x 600 x 50

580 x 455 x 50

Pavers can be plain, patterned, or ground back to expose the stone or glass aggregate. Various colours available.

580 x 455 x 50

EXPERIENCE - A proud Australian company, Norwalk is known for our ability to tailor suit our products for each of our clients needs. With a proven track record, since 1976, of designing, engineering, manufacturing and installing high quality pre-cast concrete burial systems, Norwalk has the experience to ensure your project is a success.

STAFF - Our staff share years of experience, are passionate about making your job our best and their expertise means you are guaranteed a product of the highest construction standards.

CLIENT FOCUSED - Our focus is always on how we can work best with our clients to achieve the results they are looking for, while saving them time, money and stress. We are here to help you see your designs come to life in the safest, most practical way with the least disturbance to your site.

DESIGN - At Norwalk, every aspect of our pre-cast concrete burial systems and memorial products have been designed to provide you with the strongest, integrated pre-cast system possible. We can work with you to design the perfect product for your project or utilise one of our standard designs.

ENGINEER - We work with fully qualified engineers to ensure any product we supply meets our stringent standards, along with complying with the required Australian Standards AS 4425:2020 Above-ground burial structure and AS/NZS 3500.2:2021 Plumbing and drainage, Part 2: Sanitary plumbing and drainage.

MANUFACTURE - All manufacturing is completed off-site in our controlled facility, enabling Norwalk to use specially engineered concrete, strong reinforcing mesh and to vibrate each product during pouring to ensure no voids or structural flaws which can readily occur in 'cast-on-site' installations.

INSTALLATION - Norwalk has an experienced team of installers to take the worry out of the installation process. Alternatively, we can provide you everything required for your own teams to safely and quickly install our products. Norwalk can save you as much as 90% of on-site construction time when compared with cast-on-site and considerably reduces the length of time heavy machinery is required on site.
